Welcome Address

We are happy to invite you to the forthcoming EuroEus Meeting March 23-24, 2017 in Milan, Italy.

The venue will be in Ramada Plaza Hotel with live transmission from the Pancreato-Biliary Endoscopy and Endosonography Division of San Raffaele Hospital.

This year for the first time we have scheduled a new event that will take place the day before EURO-EUS. On March 22 we have organized the EURO-EUS HANDS ON TRAINING COURSE.

A selected number of registered participants will have the exciting opportunity to be trained in advanced Operative and Therapeutic EUS including FNA, FNB, Pseudocyst drainage and more!

Following our long standing tradition you will enjoy the highest level of presentations and live demos orchestrated by our international faculty.

During the course the major hot topics concerning EUS will be covered including the approach to the pancreatic focal lesion, screening and staging of pancreatic cancer, the role of elastography and contrast, proper handling of biopsy material, interventional EUS and much more.

You are kindly invited to send abstracts for oral presentation/posters. The deadline for submissions is February 15.

We are glad to welcome Dr. Julio Iglesias as member of the scientific committee.

Looking forward to see you in Milan.

Arrivederci,

Erwin Santo, Paolo Arcidiacono, Julio Iglesias

Hands-on training course

San Raffaele Scientific Institute
Conference Centre, Floor - I

5/6 fully equipped EUS Stations will be available and run under tutoring of the Endo B/P & EUS Team of San Raffaele Hospital

The hands-on activity will cover all the topics of diagnostic and therapeutic echoendoscopy. Different set of animal models provided by Endosim Company will allow participants to perform an extensive hands-on training program on:

Gastric submucosal mass evaluation and diagnosis: EUS-core biopsy, Pancreatic Cyst FNA, FNA of solid lesions: pancreatic mass, liver mass and lymph node, Injection Therapy: Celiac neurolysis and EUS-guided embolization, Pancreatic pseudocyst drainage: plastic stents, Pancreatic pseudocyst drainage: Axios, Accessory imaging devices, Mini-probe EUS, OFDI, nCLE, EUS-guided biliary access

All the different kind of EUS devices will be used

PROGRAM:

- 14.00 Registration and assignement to Tutor
5/6 groups of 5/6 people each will be created with one Tutor
- 14.15 Hands-on training with rotation of all the participants on each station with different topics to be used
- 18.00 End of the course
